

β2-MG Recombination Protein

Basic information:

Catalog No.:	UDP9027-1	Source:	Human
Expression Host:	<i>Escherichia coli</i>	Type:	Recombinant protein
Purity:	> 90 % as determined by SDS-PAGE		

Useful Information:

Construction:

A DNA sequence encoding the β2-MG Protein was expressed with His-tag in C terminus.

Molecular Mass:

The protein of β2-MG consists of 99 amino acids.

Formulation:

Liquid in PBS, pH 7.4, containing 20% Glycerol.

Biological Activity

N/A

Endotoxin:

N/A

Storage:

Recombinant proteins are provided as frozen liquid which are shipped with dry ice. Bulk packages can be provided as lyophilized powder which shipped with blue ice.

Reconstitution:

According to the application.

Description:

Beta 2 microglobulin is a beta light chain of human leukocyte antigen molecules. Its main function is to participate in lymphocyte surface recognition and is related to killer cell receptor.

Note:

This material is offered by Gene Universal for research, laboratory or further evaluation purposes. Not for human use. Made in China.
