

proBNP Recombination Protein

Basic information:

Catalog No.:	UDP9101-1	Source:	Human
Expression Host:	<i>Escherichia coli</i>	Type:	Recombinant protein
Purity:	> 90 % as determined by SDS-PAGE		

Useful Information:

Construction:

A DNA sequence encoding the proBNP was expressed with His-tag in N terminus.

Molecular Mass:

The protein of proBNP consists of 108 amino acids.

Formulation:

Liquid in PBS, pH 7.4

Biological Activity

N/A

Endotoxin:

N/A

Storage:

Recombinant proteins are provided as frozen liquid which are shipped with dry ice. Bulk packages can be provided as lyophilized powder which shipped with blue ice.

Reconstitution:

According to the application.

Description:

proBNP is called b-type natriuretic peptide, proBNP is converted into BNP (B-type natriuretic peptide) and NT-proBNP (N-terminal B-type natriuretic peptide) under the action of the enzyme, in which BNP and NT-proBNP is to judge whether the presence of cardiac insufficiency indicators.

Note:

This material is offered by Gene Universal for research, laboratory or further evaluation purposes. Not for human use. Made in China.
