

Native Human FN Protein

Basic information:

Catalog No.:	UDP9109-9	Species:	Human
Expression Host:	<i>Native</i>	Type:	Full length protein

Useful Information:

Purity:

> 90 % as determined by SDS-PAGE

Formulation:

Liquidin PBS pH7.4, containing 10% glycerin and 0.05% Proclin 300.

Biological Activity

N/A

Endotoxin:

N/A

Storage:

Proteins are provided as frozen liquid which are shipped with dry ice. Bulk packages can be provided as lyophilized powder which shipped with blue ice.

Reconstitution:

According to the application.

Description:

Fibronectin(FN) is a high molecular weight non-collagenous glycoprotein with 4.5-9.5% sugar content. It is mainly produced by liver and vascular endothelial cells and widely exists in plasma, various cell surfaces and cell matrix. FN plays a key role in regulating cell adhesion, migration, growth, proliferation and differentiation, and is involved in wound healing, embryo development, immune regulation and other processes, with a variety of biological activities and biological functions of cell regeneration and repair.

Note:

This material is offered by Gene Universal for research, laboratory or further evaluation purposes.
Not for human use. Made in China.
